

Connect to RunPod

There are many ways to interact with RunPod:

- Web interface
- CLI
- SDKs
- GraphQL

Web interface

Create an account and then log into the web interface at the following address:
runpod.io/console/login.

CLI

You can use RunPod's CLI `runpodctl` to manage Pods.

The `runpodctl` is a tool for managing your GPU pods on RunPod. All Pods come with `runpodctl` installed with a Pod-scoped API key, which makes managing your Pods easier through the command line.

SDKs

RunPod provides SDKs for Python and Go to for the RunPod API and serverless worker SDK.

GraphQL

You can use GraphQL to manage your Pods, Serverless, and more.
