Manage Pods

Start a Pod

Web   Command line

1. Navigate to the **Pods** page.
2. Click the **+ New Pod** button.
3. Choose your Pod and click **Deploy**.

> 💡 **TIP**
>
> If you're not sure which Pod meets your needs, see <u>Choose a Pod</u>.

4. (Optional) Choose a template.
5. Click **Continue**.
6. Verify your Pod configuration and click **Deploy**.

Next, RunPod builds your Pod. You'll start paying for the Pod as soon as it's built.

Stop a Pod

Web   Command line

1. Click the stop icon.
2. Confirm by clicking the **Stop Pod** button.

> ⚠️ **WARNING**
>
> You are charged for storing idle Pods. If you do not need to store your Pod, be sure to terminate it next.

Terminate a Pod

Web   **Command line**

1. Click the hamburger menu at the bottom of the Pod you want to terminate.
2. Click **Terminate Pod**.
3. Confirm by clicking the **Yes** button.

List Pods

If you're using the command line, enter the following command to list your pods.

```
runpodctl get pod
```
